The Prison is found in the centre of Enkhuizen and the building was built in 1612 and repaired in 1908. On the day of writing this, this place was closed due to construction. Most of the building is still original and from the 17th century. The building is leaning to the left a lot so it has moved since the 17th century. Near the prison there is almost no parking except on the street. The prison nowadays is a museum so you can get a tour there. It is not for all ages because it is a prison and I do not recommend bringing a 1-6 year old. The prison charges entrance fees and is part of the Oud Enkhuizen Association. For teenagers, the venue is small and may not be interesting for all visitors. If you are interested in going here I would recommend going by bike. If you go by car, park at the railway station. The prison is about 120 m².

De Vesting / the ramparts

The vesting (ramparts) is one of Enkhuizen's dikes. It was built around the city to protect it. The dike makes for a beautiful walking route with its nice view. Dogs also like it because they can run up and down the dike. The dike was built in 1540 and it was ordered by Mr. Adriaen Anthonisz, the mayor of Alkmaar. The vesting also has two water gates, the Ouwe Gouwsboom and The Boerenboom. Both were built in 1608. They had gates that opened and closed in case of an emergency. The Koepoort was also built around that time, which is the city gate. The building of the city gate took 5 years, because the materials couldn't be delivered. You get onto the ramparts by going to the start of the dike or by getting up on one of the two bridges. The vesting is an amazing place to go walking on with family or friends.

The Zuiderzee museum is located to the east of Enkhuizen and on the coast. The Zuiderzee museum is open from 10 am to 2 pm. The Zuiderzee museum is a place where a lot of schools go in the Netherlands for education about how we have lived for years in the Netherlands in years gone by. We have had a constant struggle with the sea. Officially, we are under the sea. Most of the Netherlands is built on wooden support beams to keep our feet dry. The Zuiderzee museum teaches you about how people lived in the Netherlands back in the day. You can take the boat to the museum if you want. You could also go to the stores there and buy old Dutch products. There is lots of parking spaces for bikes. For cars you will have to park at the station. Take a walk back in time come and visit the Zuiderzee museum.

Did you know that the ships are real there?
